**Scott Anderson**

Scott is a Data Scientist at the U.S. Army Audit Agency, the Army's internal audit organization. He has served in this role since February 2022 and is responsible for designing and implementing the Agency's data analytics initiatives, leveraging his technical expertise to inform strategic decision-making. Additionally, Scott is a member of the instructor cadre, providing training and guidance to audit teams on the effective use of the Army's data platform, Vantage.

With a strong background in data management, Scott has previously worked at Army Materiel Command (AMC) and the Department of Health and Human Services, where he successfully modernized, integrated, and sustained various data initiatives. During his time at AMC, he developed his skills as an operations research and systems analyst, completing numerous studies that addressed key challenges in Army logistics operations.

Scott holds a graduate degree in Information Science and an undergraduate degree in Mathematics and Computer Science.
